Assignment #2: Project description and work sample

The yearbook is going to benefit the school because it will be a way to end the year and give joy to the students and faculty. I think it is self explanatory that a yearbook is a book that shows memories over the past years and everyone's school picture. I am using Microsoft Publisher and I am using a blank canvas everytime I design a new page. I'm hoping to incorporate some graphic design skills and we are hoping to get it professionally published by the end of the year. I am not sure how long it will take to complete and I am not sure when I am going to receive this years school photos of everyone, but when I do I don't think it'll take much more time. I still need to get it critiqued and see whether or not I need to add any more pages. Once I am done, I will probably help with graduation, prom, field day, etc.
